

Great value, great design

These windows have it all!

This series was designed and engineered to take advantage of the most innovative, efficient production and manufacturing processes. These significant economies are passed directly on to the consumer—so you'll start saving with our casement / awning windows the moment you buy them.

Put this series high-tech performance to work on your next housing project... and build in extra value from the ground up.

Everything you're looking for... now!

1 100% lead-free uPVC

Our uPVC process produces an environmentally safe compound that stands up to whatever the sun, rain, wind, snow and salt air can throw its way.

2 Great windows—great choice

Today's leading technologies go into a complete line of fully accessorized windows, making it easy for you to customize windows to your exact needs.

3 No drafts or energy loss

These windows meet our industry's toughest thermal efficiency standards. So you can save on your heating and air-conditioning costs without sacrificing comfort.

4 All-season durability

The multi-chamber technology guarantees structural frame integrity and durability in any season, year after year. This unique technology also blocks the transfer of cold air and noise from the outside to save you energy and enhance the quality of your life, while its fusion-welded corners seal out air and water to keep the elements at bay.

5 Attractive design

These windows are made of slimline PVC extrusions to maximize viewing area and allow the most sunlight possible into your home. Beautiful beveled-edge exterior design gives a standout, elegant look.

6 Cleaning's a snap with PVC!

High-quality PVC window frame is virtually maintenance-free. Simply wipe dust off with a damp cloth every now and then. You'll never have to paint or stain ever again. Your windows will keep on looking great in every season, year after year.

7 Security-minded

Opening mechanism and high-security multipoint lock parts are firmly fastened in screw boxes and stay secured. Our exclusive screws are specially designed for uPVC. All screws install through a minimum of two walls for greater stability.

What your home **deserves**

Additional features

- An integrated brickmold cuts down on installation time, guarantees a perfect fit and prevents water infiltration in the walls
- Can be installed as structural windows
- Can be specially reconfigured in any number of ways
- Durability and elegance add value to any home
- Superior thermal insulation
- Convenient operating panels allow easy cleaning from inside
- Multipoint locking system available for extra protection
- Sashes readily accept a wide range of energy-smart glass options
- Rigorous performance testing ensures years of trouble-free operation
